

My daughter, Kristin, is 5 years old.

She started attending full day care at Tadika Tunas Didik this year.

I'm more than pleased with her progress. She reads very well in English, has picked up Mandarin and Bahasa Malaysia entirely from school.

Montessori approach is an excellent way in helping children to build a solid foundation in phonics and mathematics, to develop concentration and motor skills.

Kristin enjoys the theme-based activities ranging from solar system to continents.

It is amazing how much and how fast a child can learn when he or she is properly guided.

I appreciate the passion and dedication that I see in the teachers. They are qualified and experienced Montessori teachers. They are also very sincere and approachable. They take genuine interests in the overall development of the child.
